SPECS

Predict and understand heat waves

A case study of summer 2003 and 2010

C. Prodhomme, F. Doblas-Reyes, O. Bellprat, E. Dutra

HEPEX workshop, Norrköping, SMHI, 22/09/2015

SEVENTH FRAMEWORK PROGRAMME

SPECS
Seasonal-to-decadal climate Prediction for the improvement of European Climate Services

SPECS aims to identify the main problems in climate prediction and investigate a battery of solutions from a seamless perspective

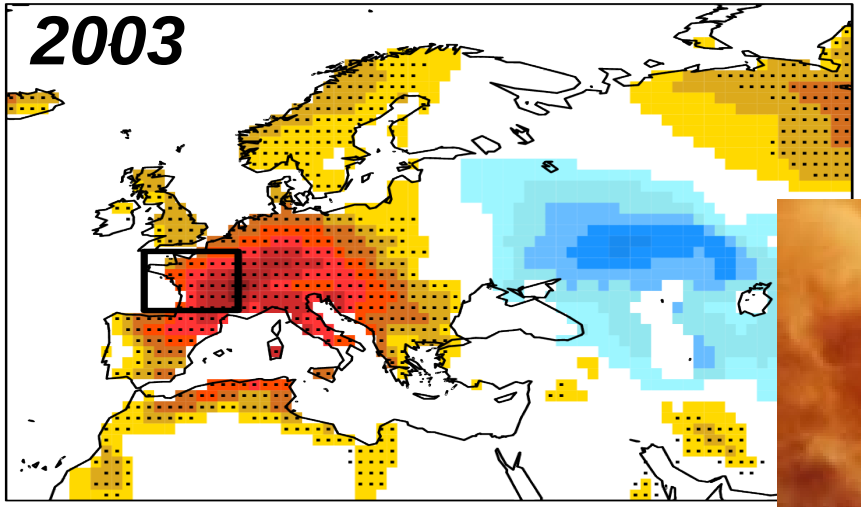
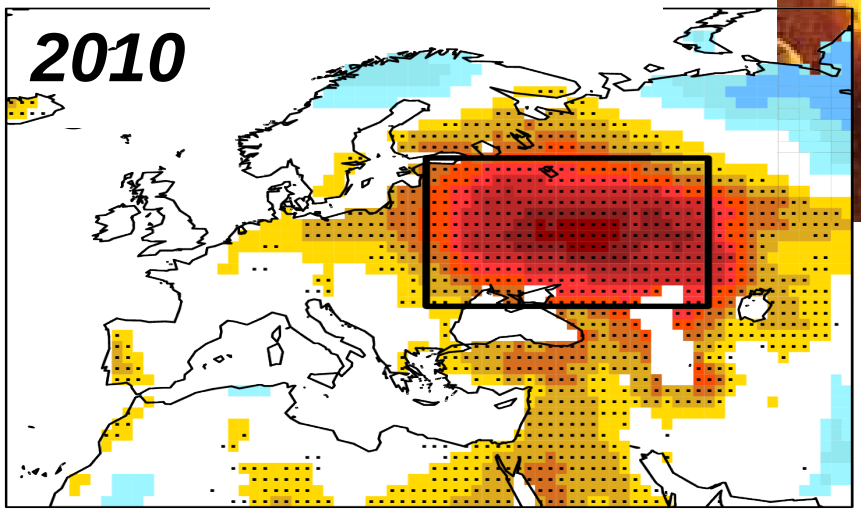
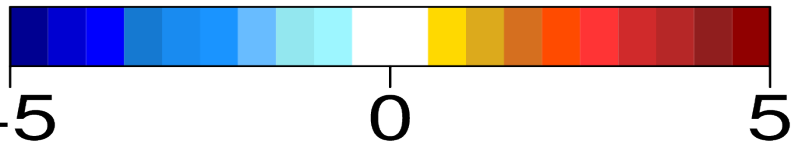
2003 and 2010 heat waves

Barcelona Supercomputing Center
Centro Nacional de Supercomputación

2m-Temperature anomalies (JJA)



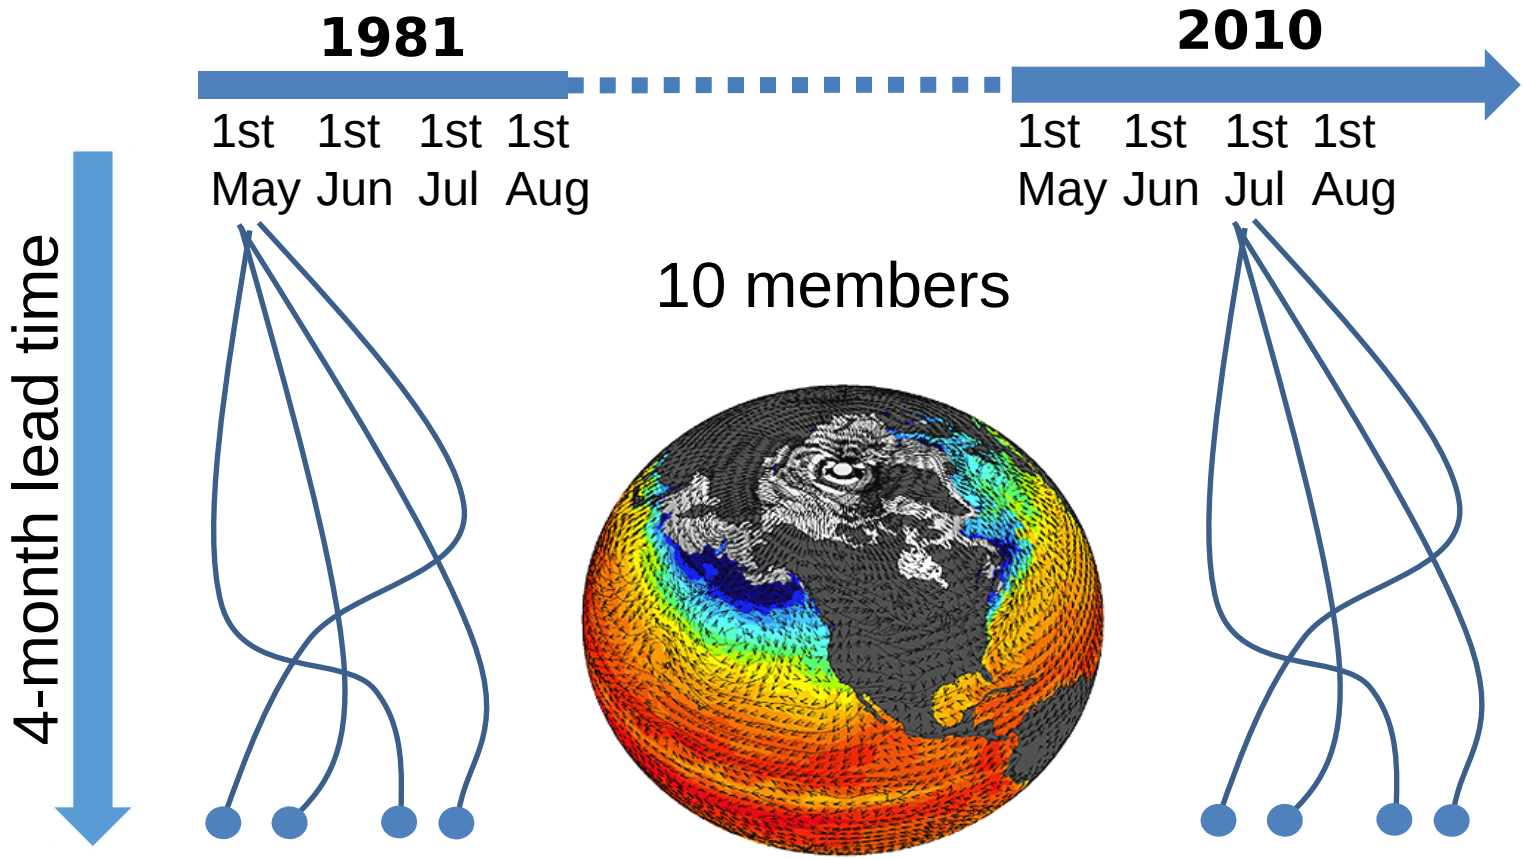




The European heat-wave of 2003 caused the death of 35,000 people and damages of $15 billion.

Experiment description

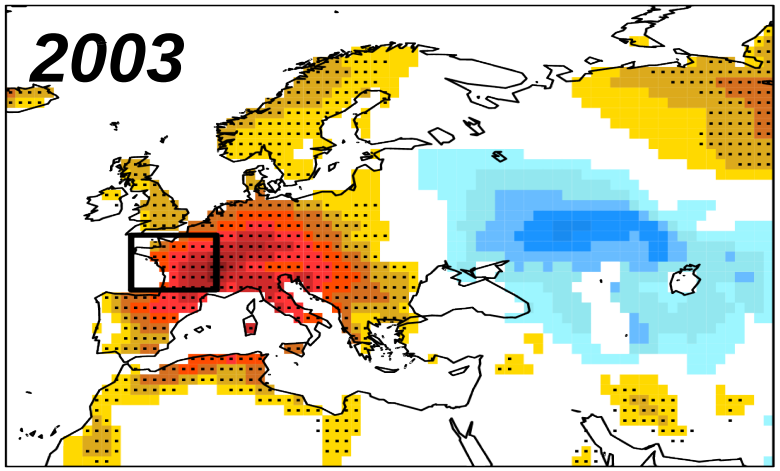
Model	Start dates	Land IC	Atm IC	Oce/Ice IC
EC-Earth 2.3	**May**, June, July, August	**ERA-Land**	ERAInt	ORA-S4

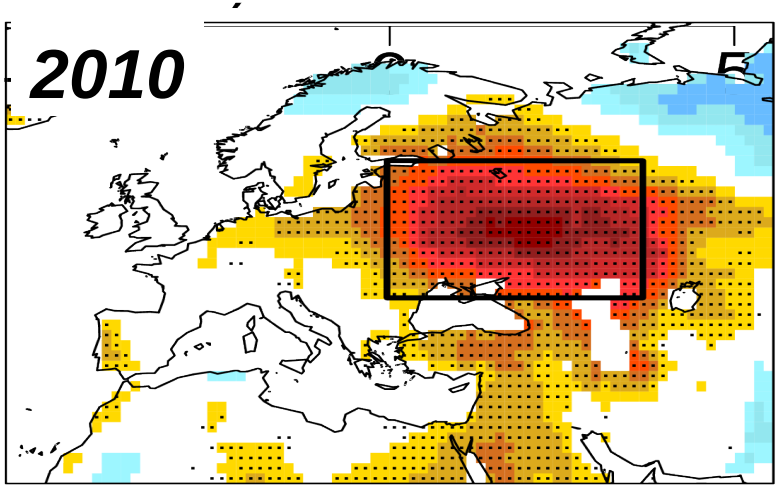


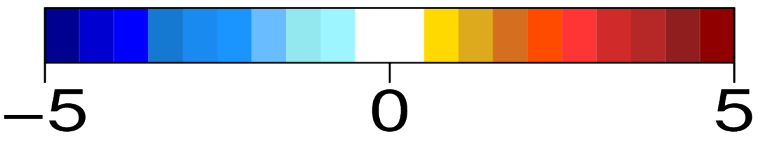
Are they predictable?

Barcelona Supercomputing Center
Centro Nacional de Supercomputación

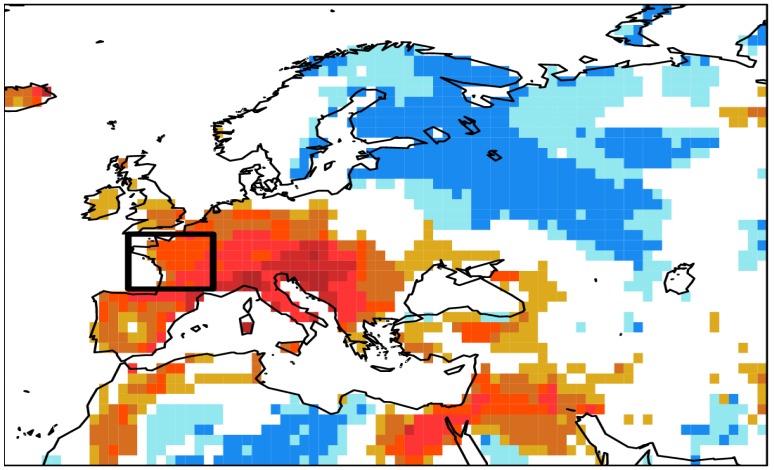
2m-Temperature anomalies (JJA)

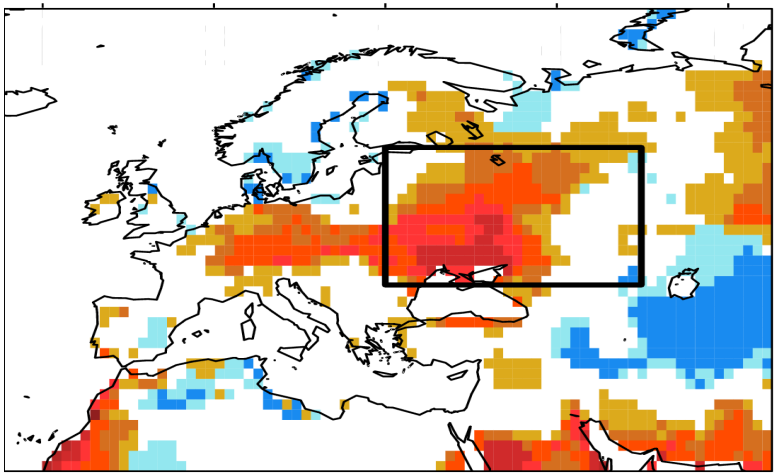


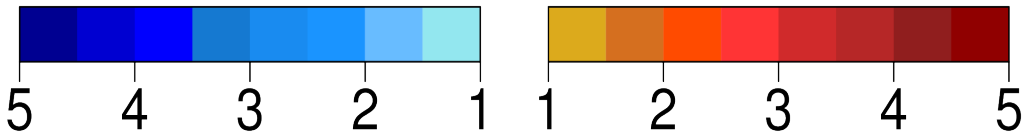




Odds Ratio (JJA)





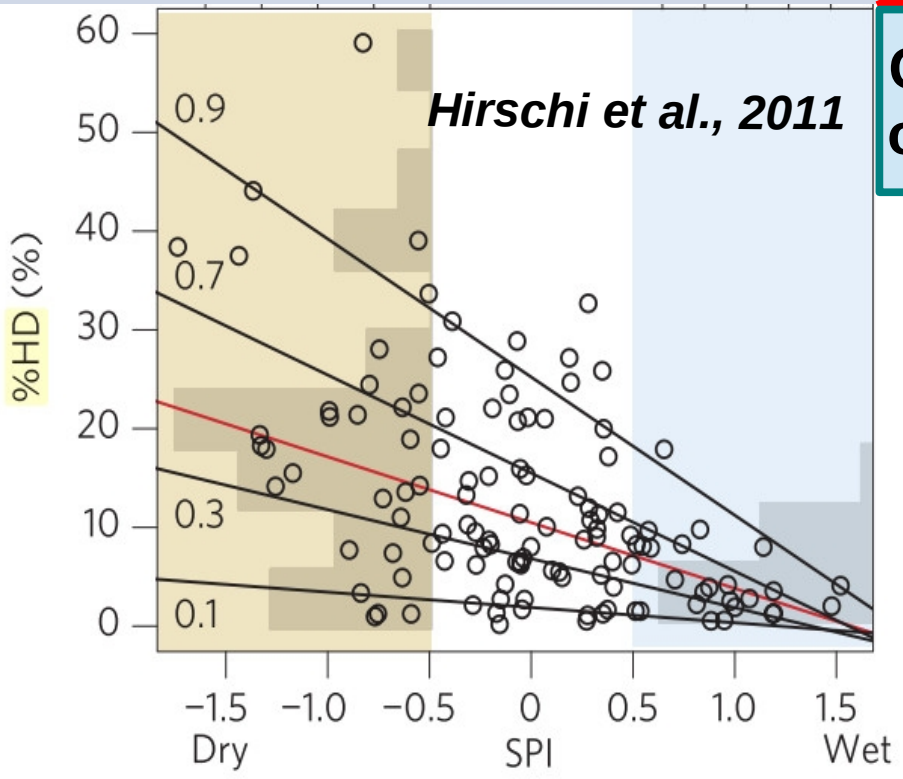


Why are they predictable?

Large scale vs local processes

Model	Start dates	Land IC	Atm IC	Oce/Ice IC
EC-Earth 2.3	**May**, June, July, August	**ERA-Land**	ERAInt	ORA-S4

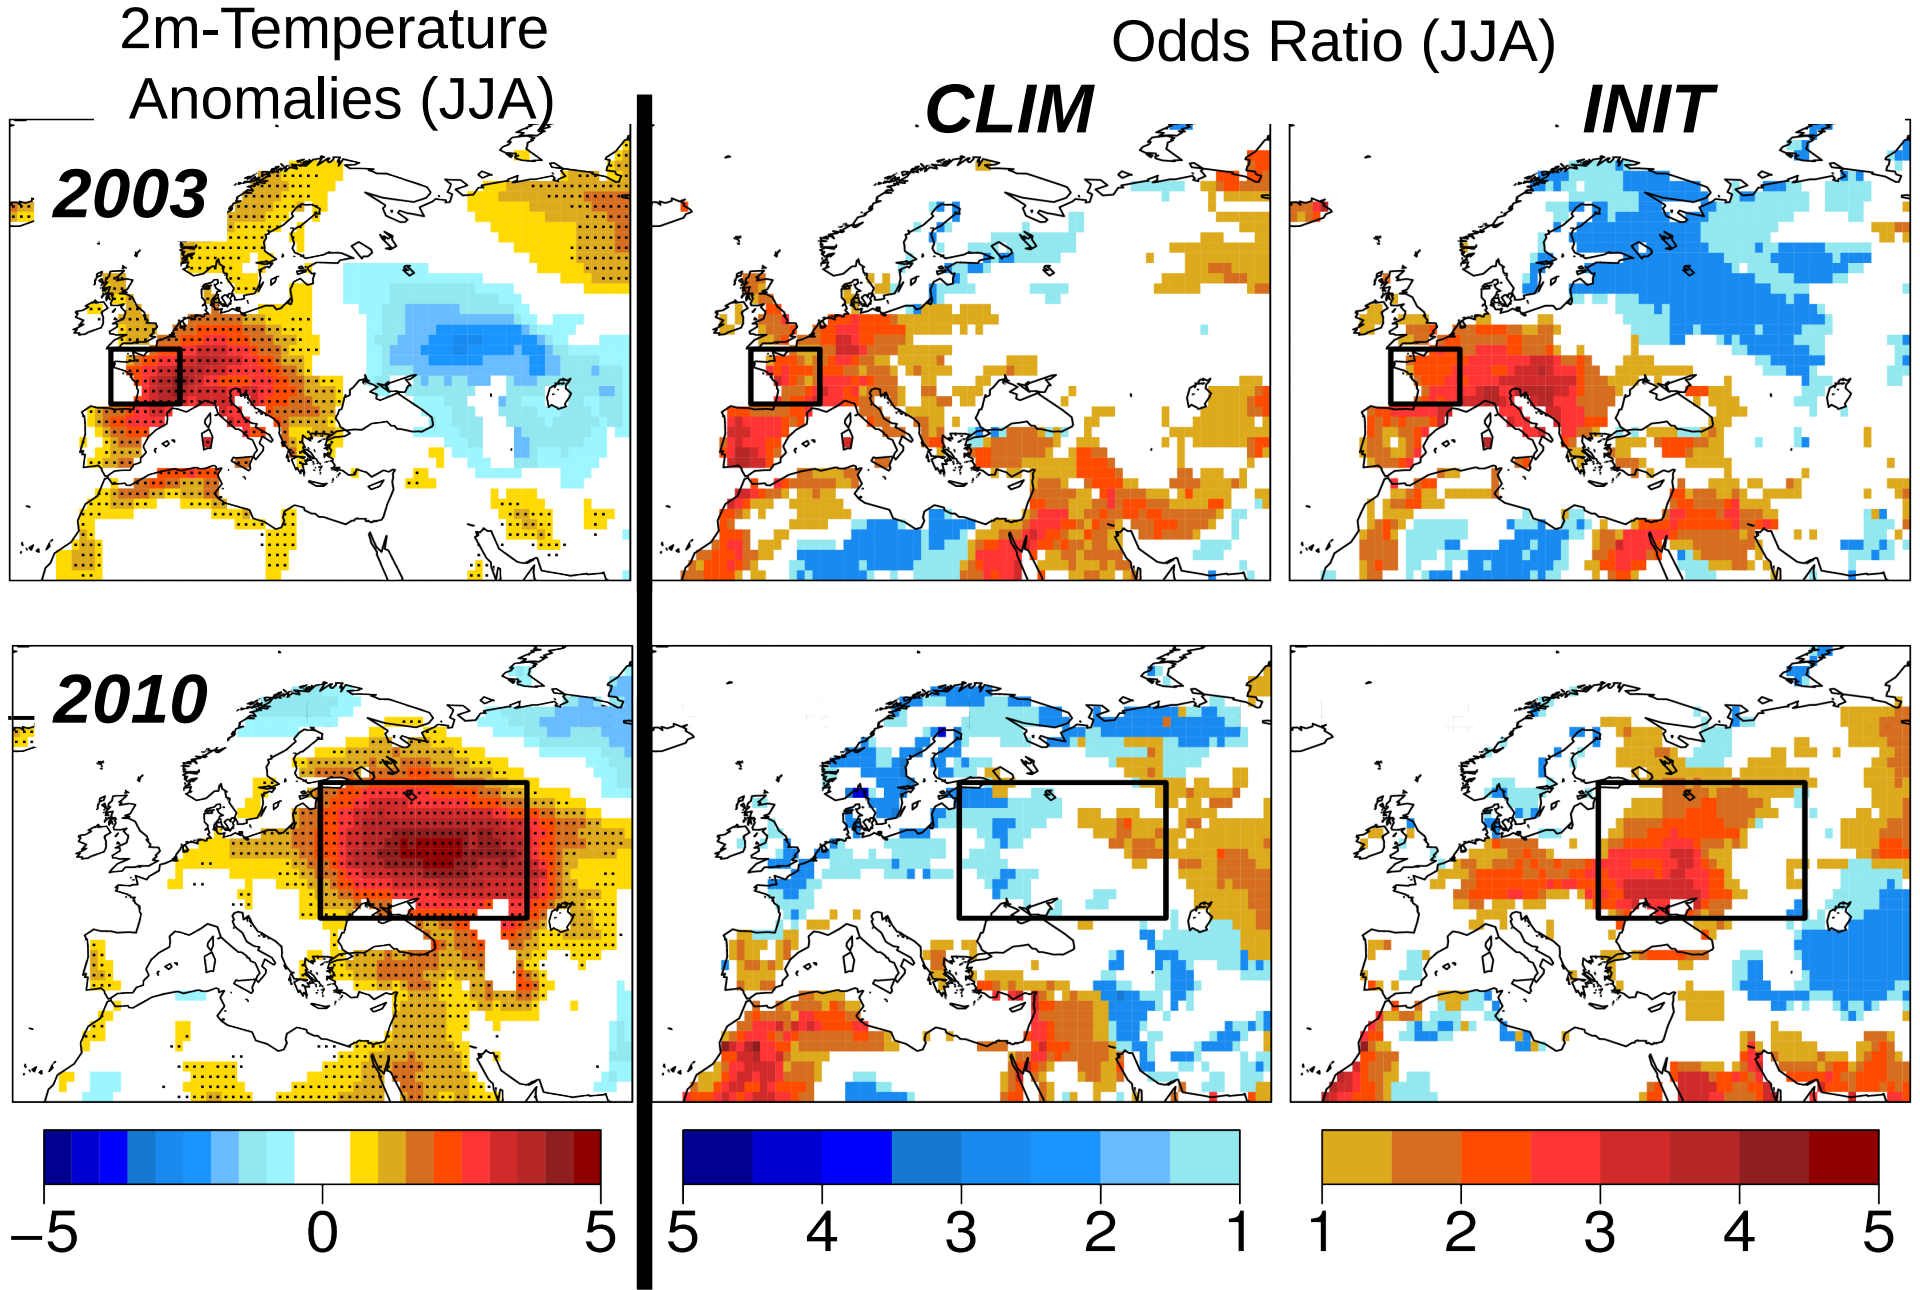
Climatology of ERA-Land



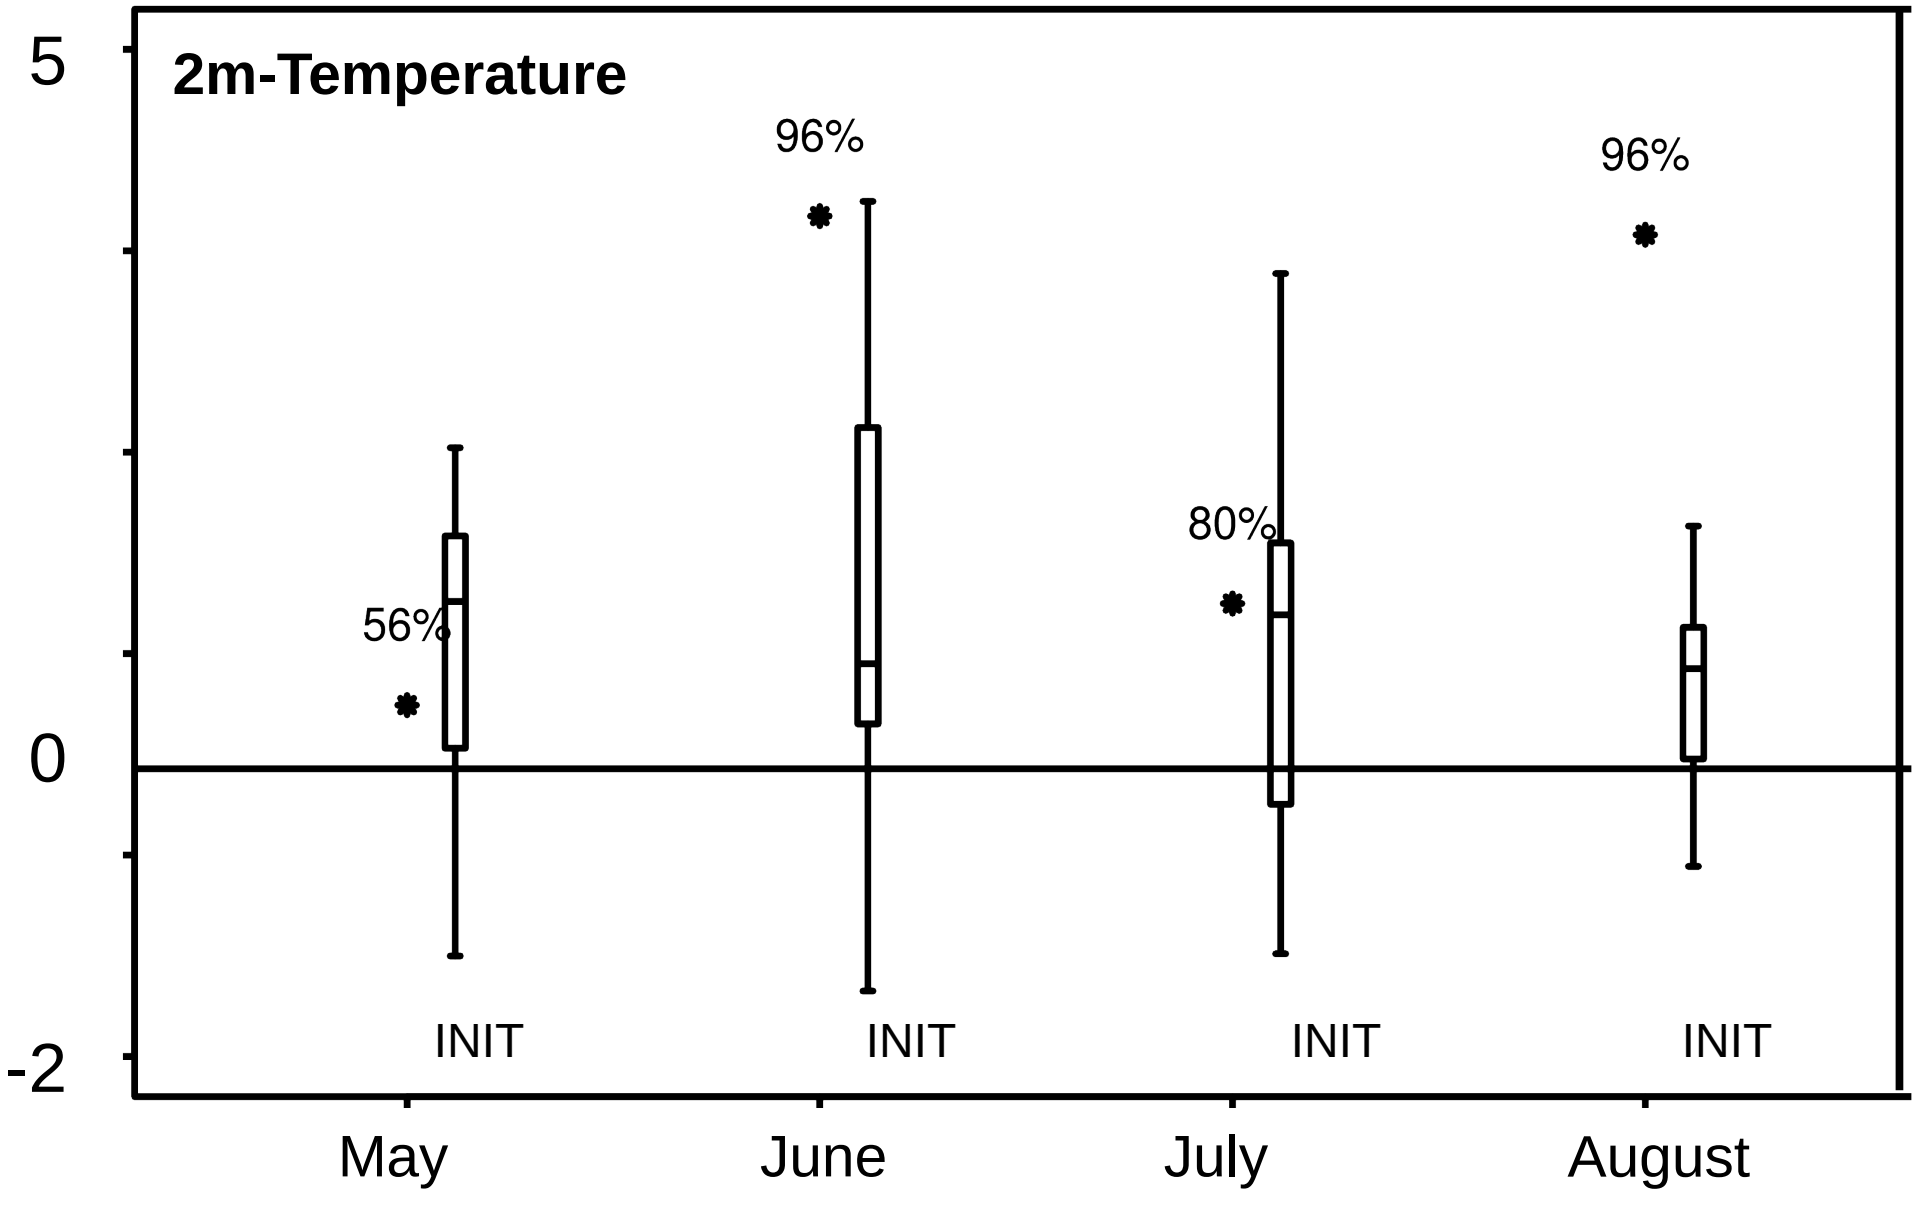
Percentage of Hot Days (%HD) vs the Standardized Precipitation Index (SPI) in the southeast European domain (1961–2000 period).

Land IC contribution

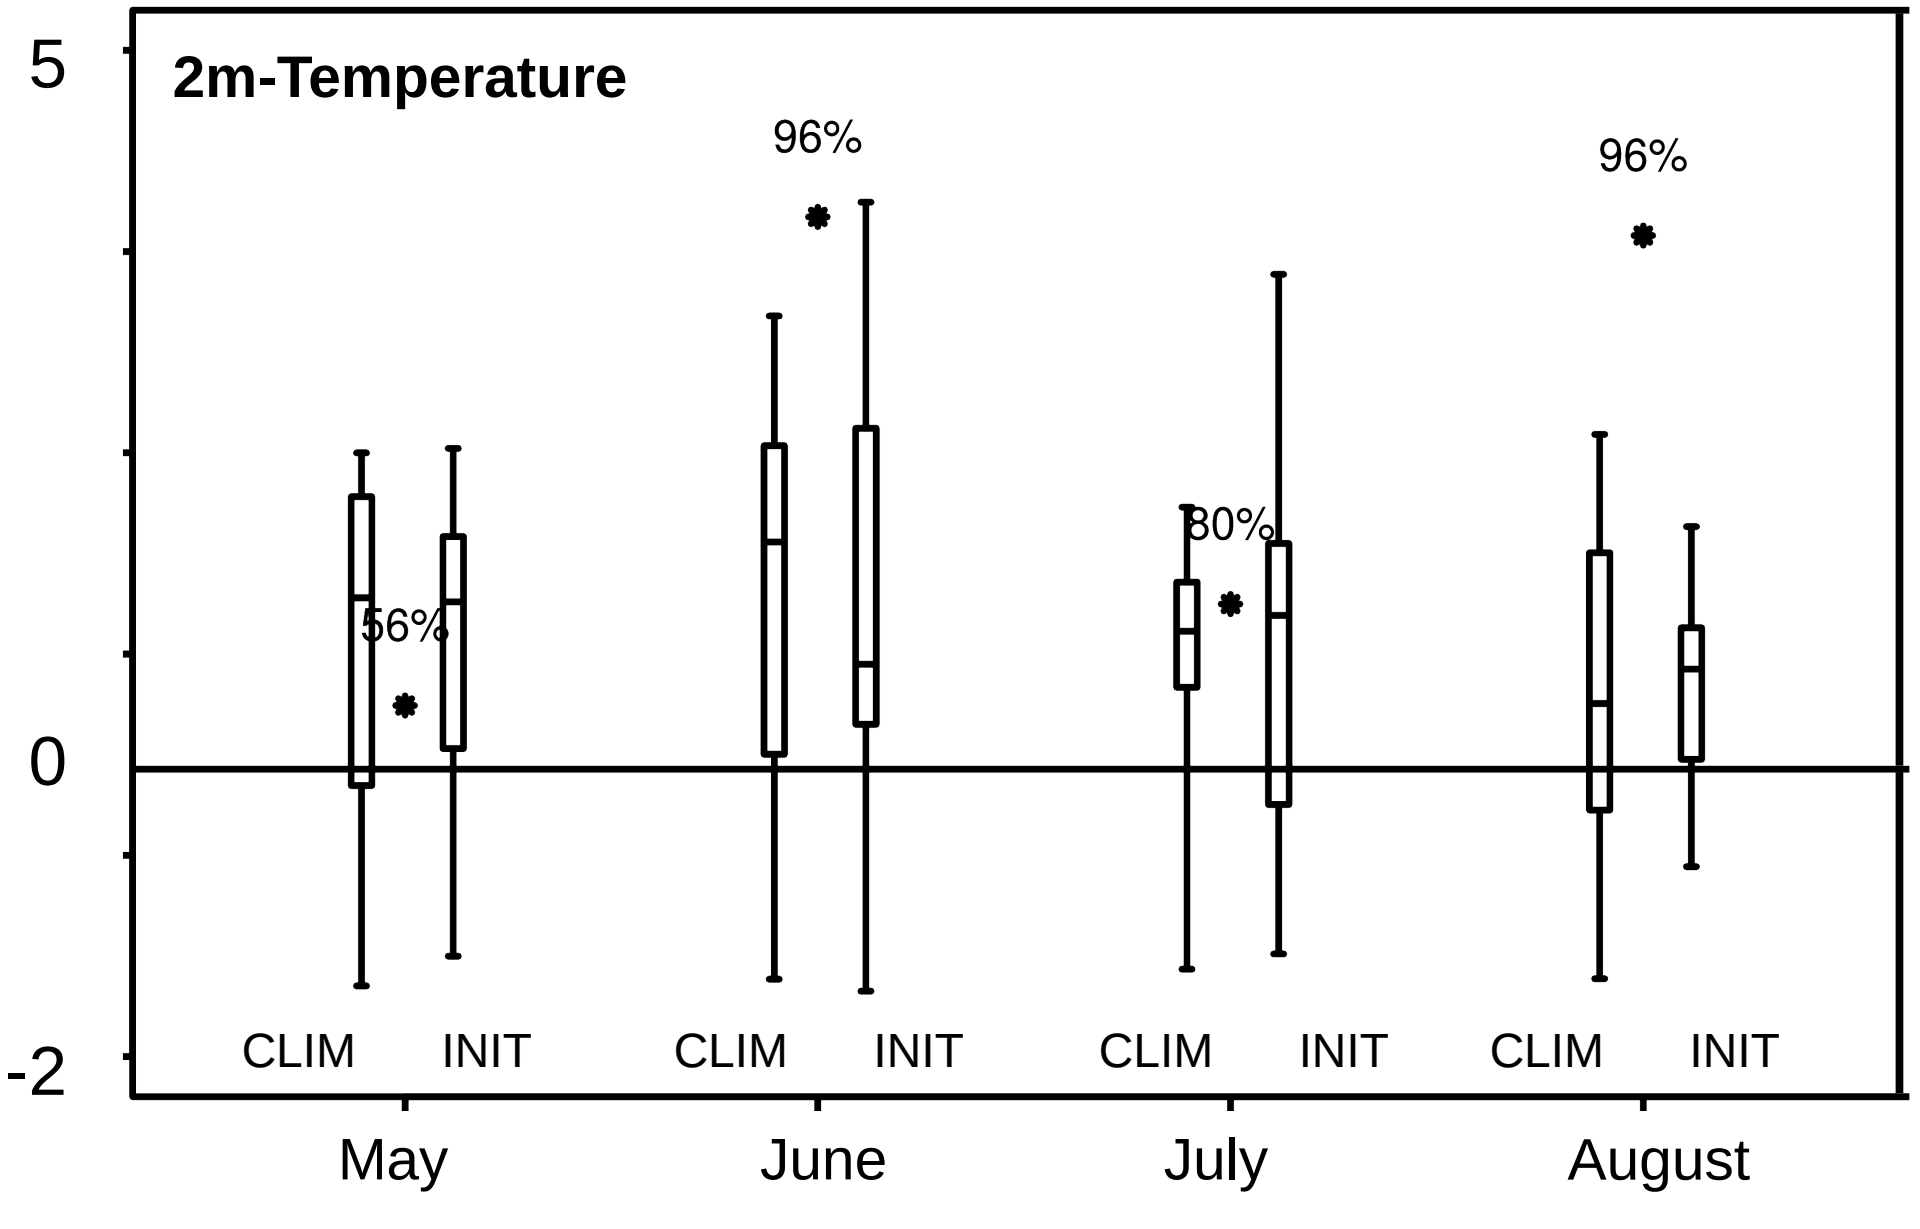
Barcelona Supercomputing Center
Centro Nacional de Supercomputación



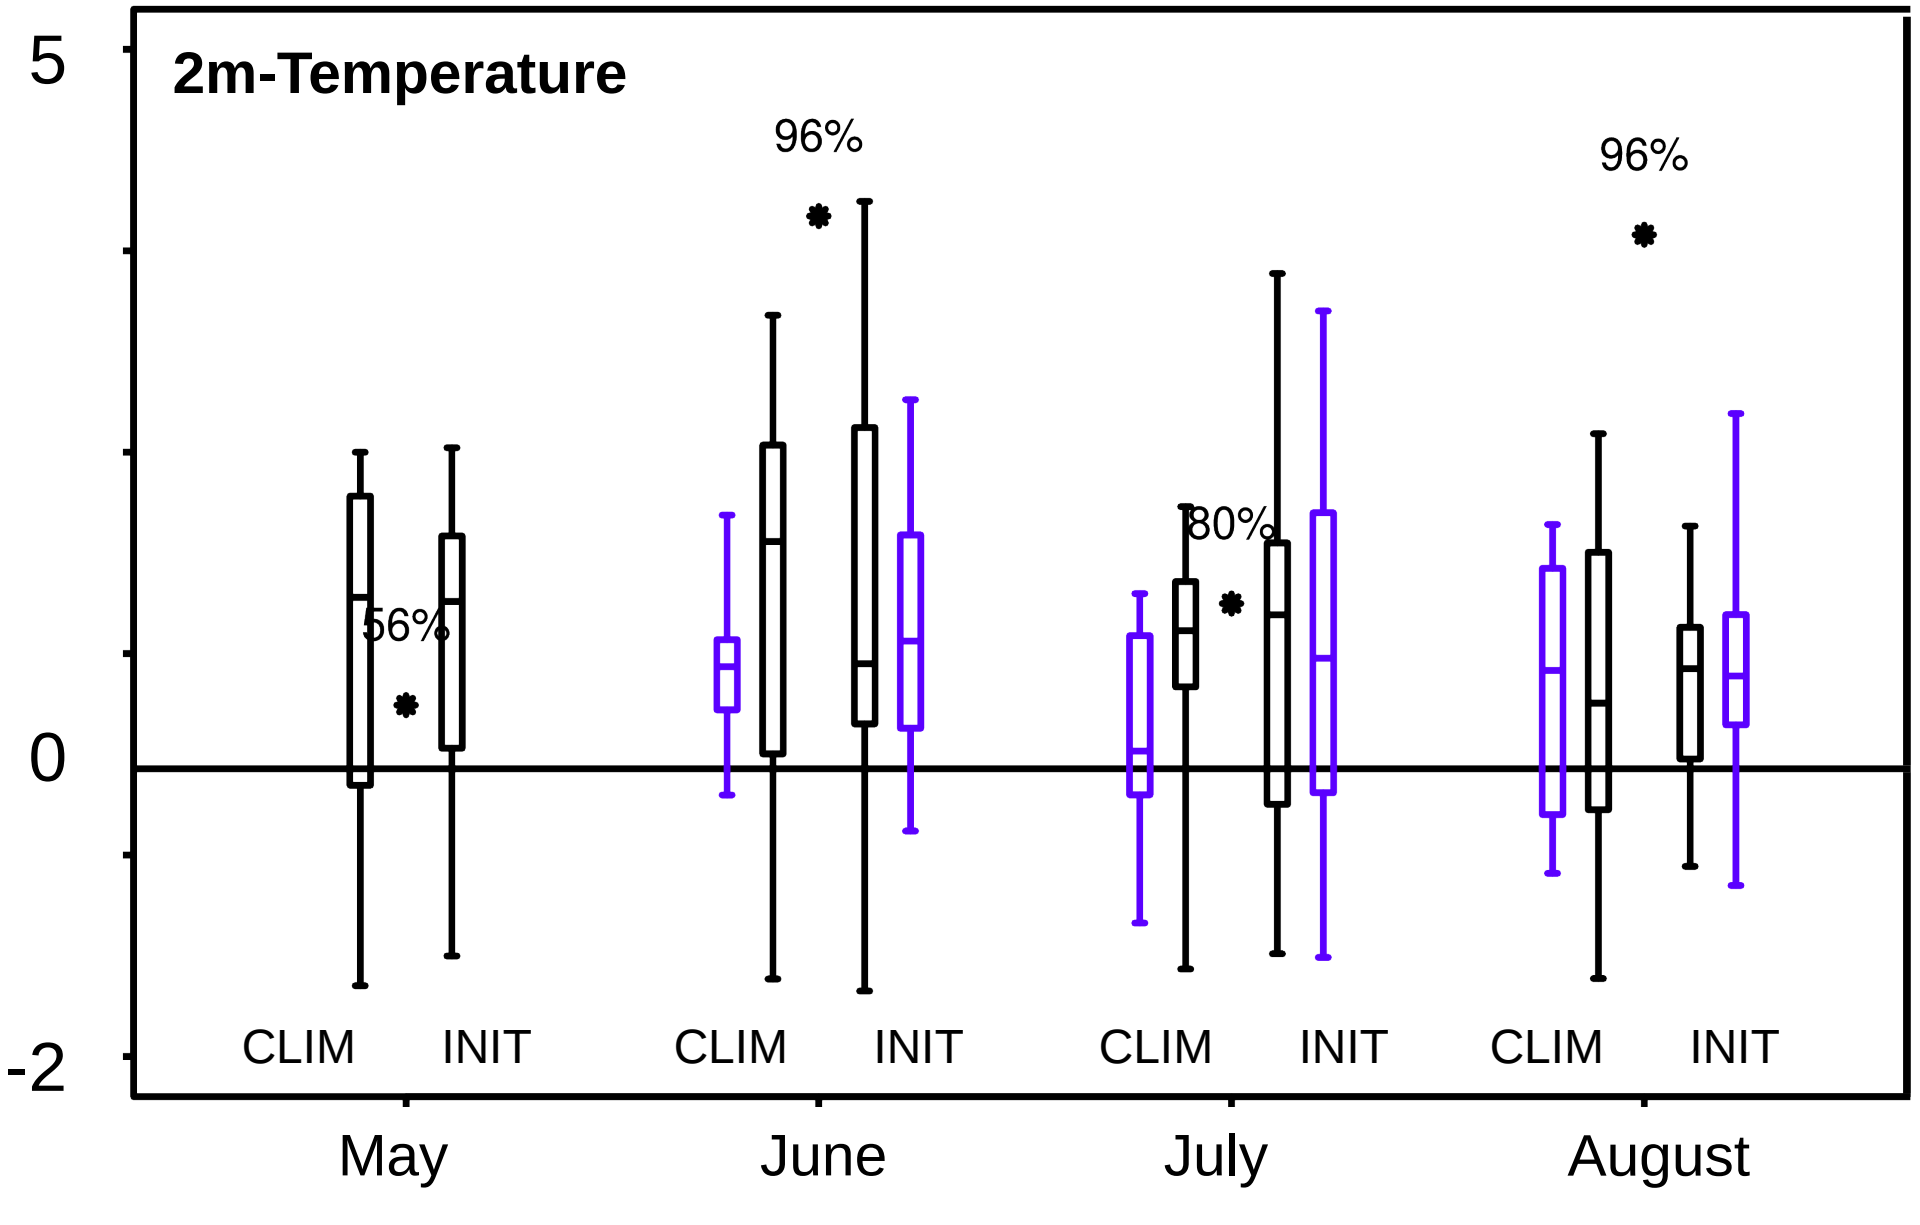
Intra-seasonality of the 2003 heat wave



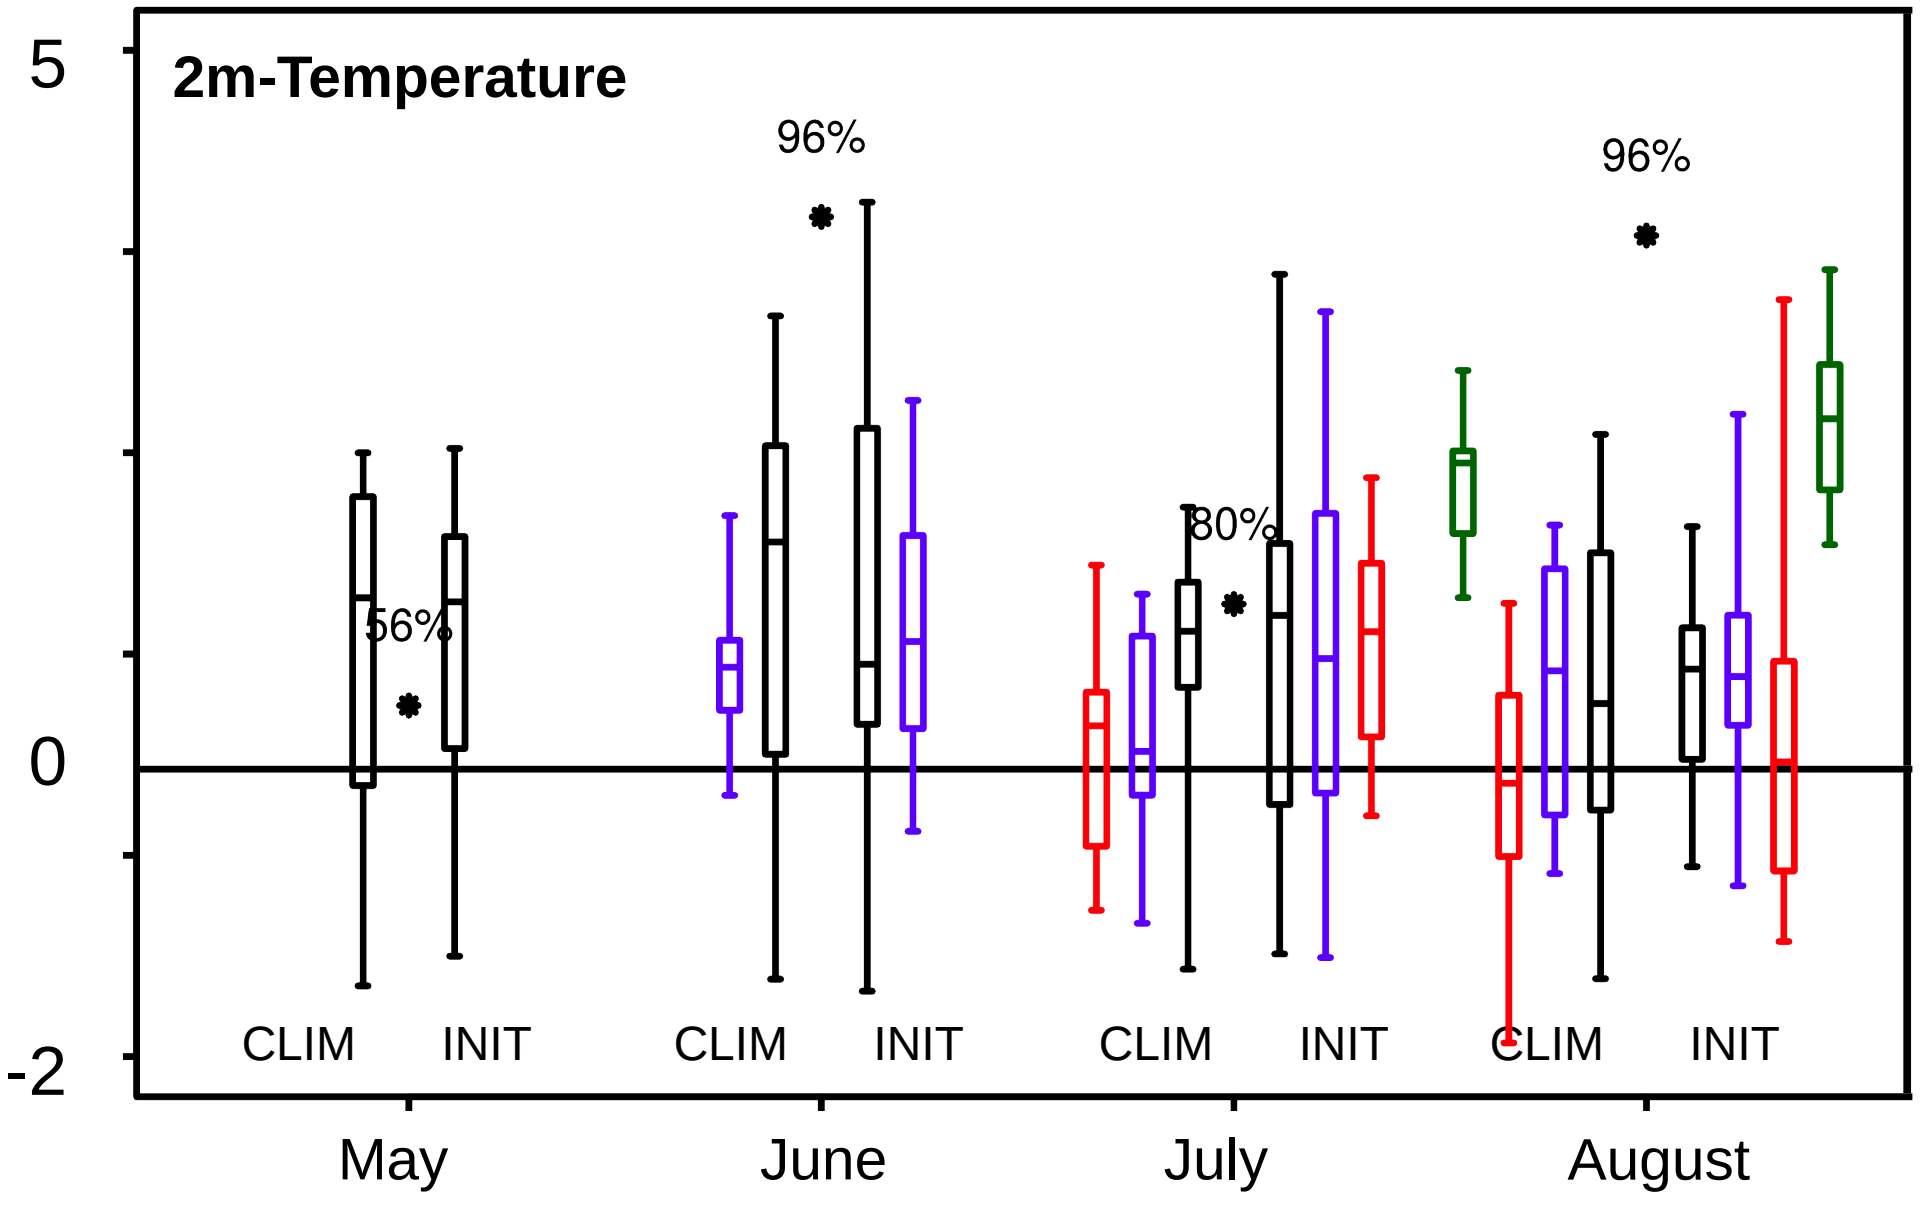
Intra-seasonality of the 2003 heat wave



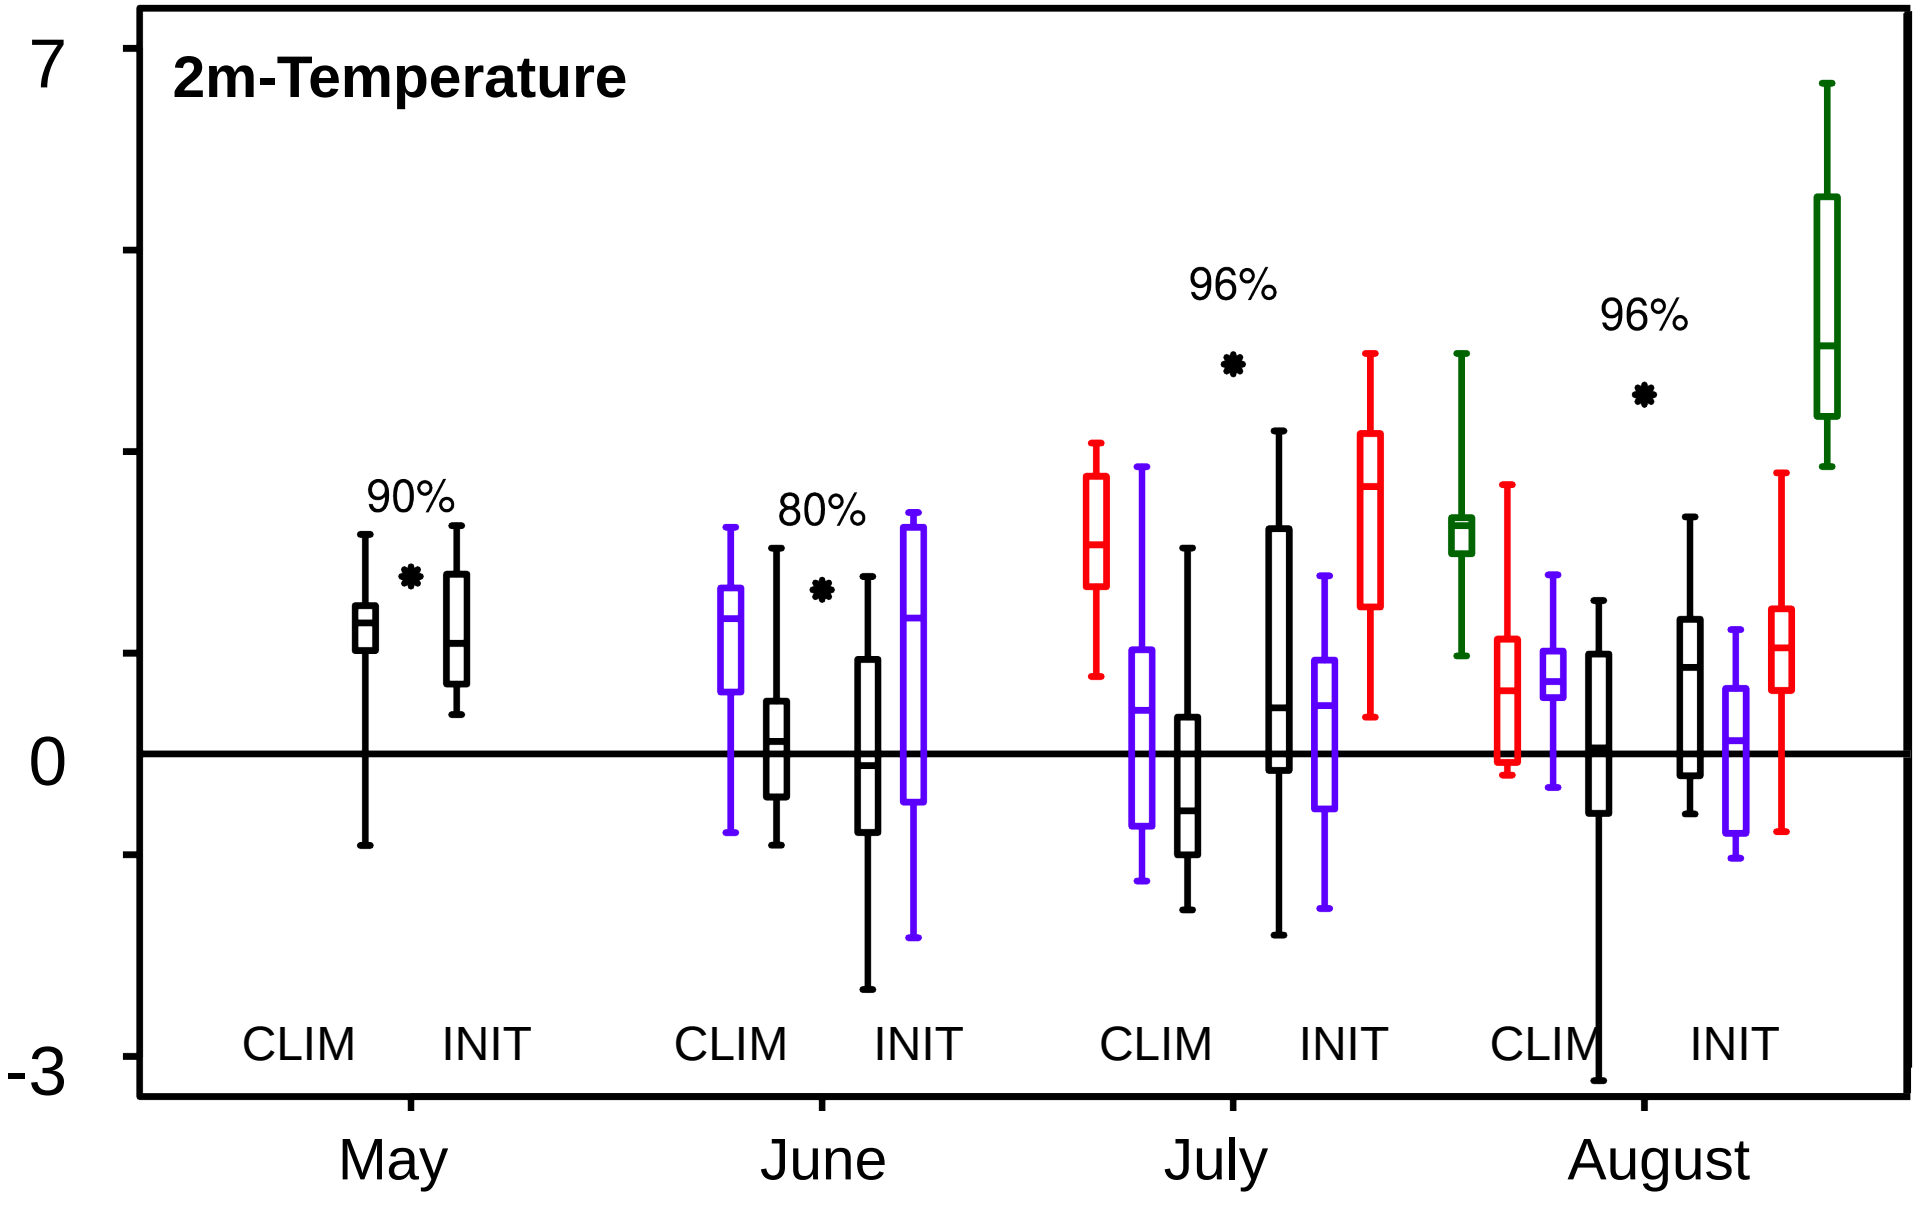
Intra-seasonality of the 2003 heat wave



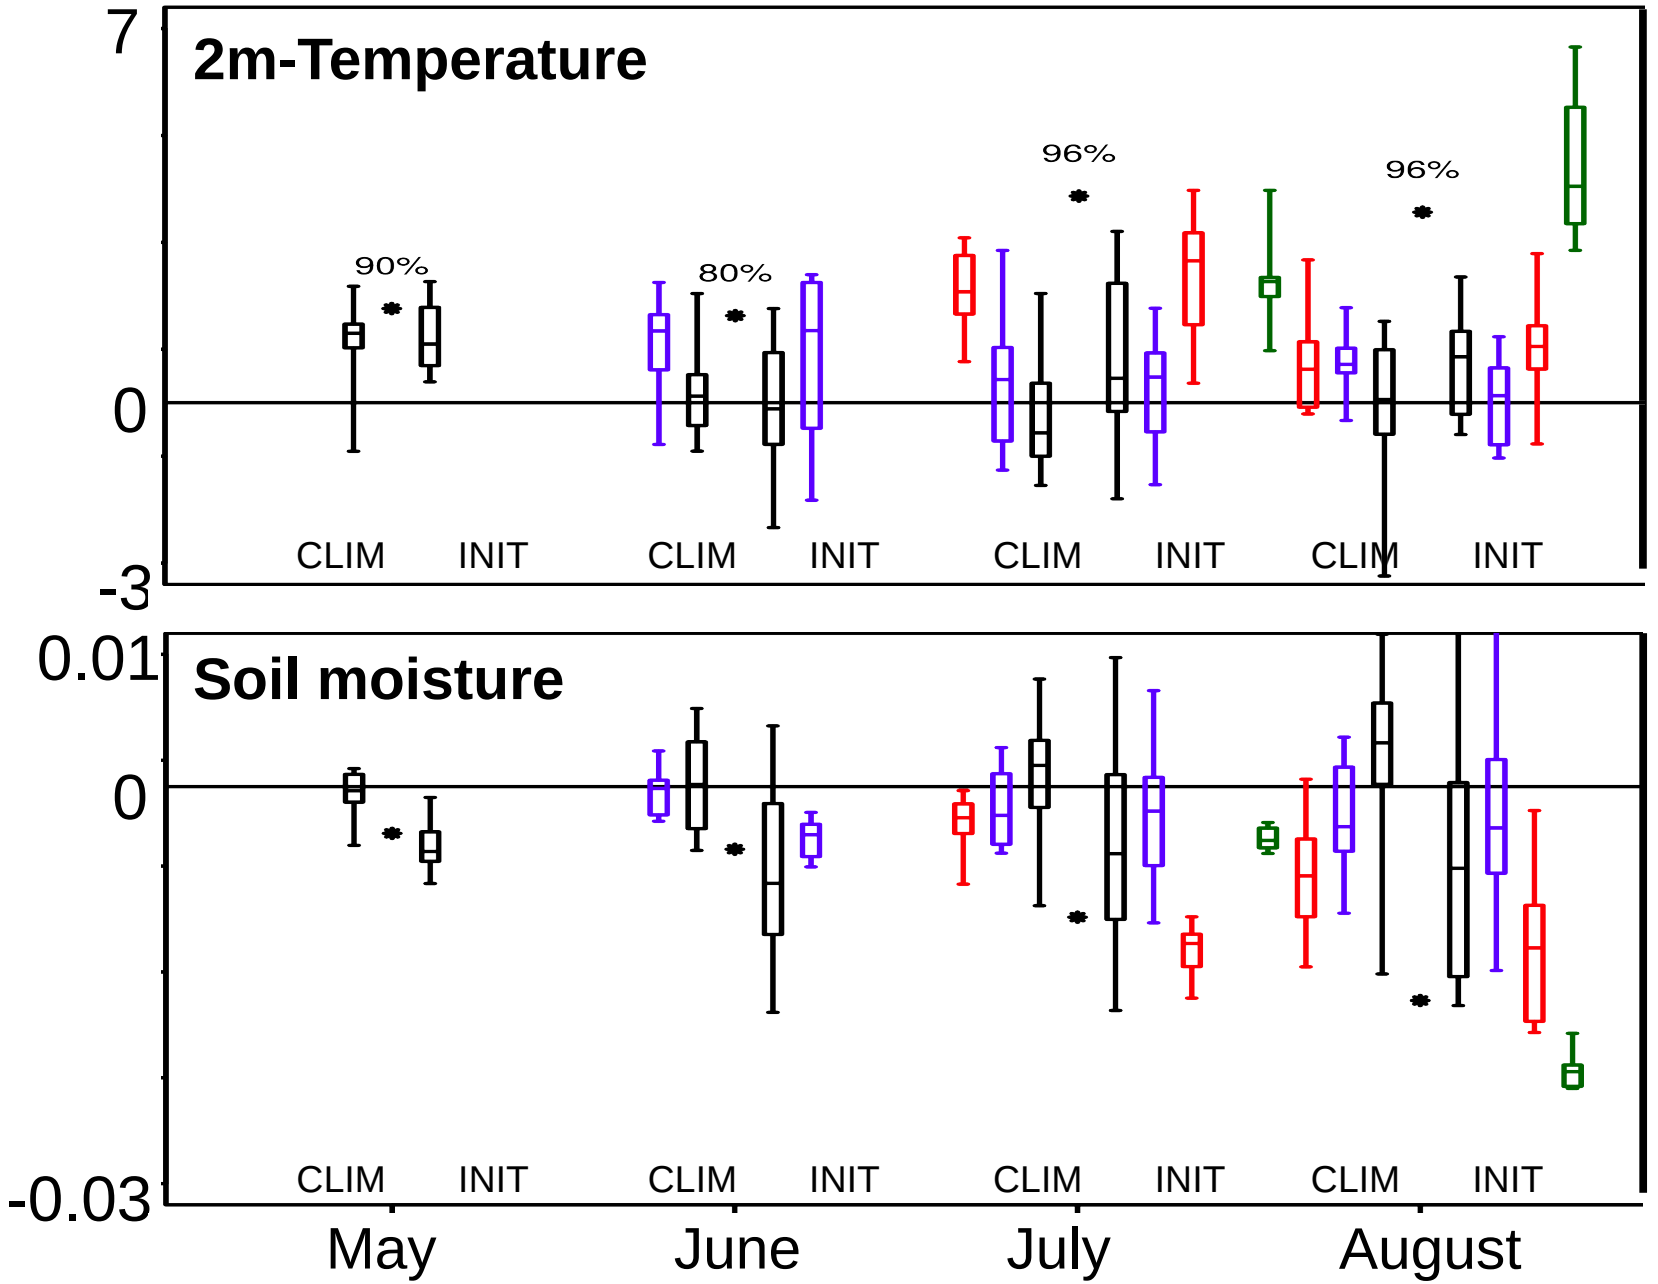
Intra-seasonality of the 2003 heat wave



Intra-seasonality of the 2010 heat wave



Land – atmosphere coupling



Conclusions

- Both 2003 and 2010 heat waves were predictable.

- 2003 seems to be mainly large scale driven.

- Realistic dry soil initial conditions are necessary to reproduce the 2010 heat wave 2-3 month ahead.

- August 2010 temperature was highly sensitive to soil conditions.

Prodhomme C., Doblas-Reyes F., Bellprat O., Dutra E., 2015: Impact of land-surface initialization on sub-seasonal to seasonal forecasts over Europe. Clim. Dyn., Under Minor Revision

Impact of resolution

Model	Start date	Land IC	Atm IC	Oce/Ice IC
EC-Earth 3.1	May, Nov	ERA-Land	ERAInt	GLORYS
